

XL MONITOR STAND | SETUP INSTRUCTIONS

1) Attach 3" round poles to base with bolts from below.

2) Next, secure upper base shelf to round poles with bolts.

3) Now slide 36" poles through square holes & attach to base with bolts from below.

4) Once everything is tightened, place base upright.

5) Attach square pole extensions using pole connectors. Tighten set screws with Allen wrench.

6) Slide optional light bar over square poles and allow to rest while monitor mount is attached.

7) Attach monitor mount using additional Allen wrench.

8) Slide optional light bar up. (Light Bar will rest on panel).

9) Insert panel into pole channels by applying tension, below optional light bar.

10) Finish by attaching monitor mount brackets to the back of the monitor (see monitor mount instructions) & install monitor onto the stand. Plug in optional light bar if applicable.
